

**FALL, WINTER, SPRING, SUMMER is a great time to  
Pamper yourself with FANIE**

**CONTOUR RESTYLING SCULPTURING SKIN CRÈME;**

**For healthy skin today, tomorrow and always**

This unique Contour Restyling Sculpturing Skin Creme is the original formula developed 30 years ago by Dr. Clyde Johnson. Often copied but never equaled, it was formulated to be a true toner that produced progressive positive results when used weekly. "Not a fluid loss." The formula is water-soluble and when applied as directed it absorbs into the topical voids of clean skin helping to tone, tighten, and condition the body's skin that needs attention when exhibiting the appearance of aging or dimpled skin known as "cellulite". This specialized crème's soothing heat action does this by stimulating and accelerating the skin's natural circulation topically, thus benefiting skin that is not affected by diet or exercise. It has a pleasant smell and feeling when the body areas are wrapped firmly, but not to tight with a plastic wrap. This method physically helps produce a natural heat action that causes a raise in the surface skin temperature within the skin tissue as well as the plastic wrap compressing the natural body heat in the skin for a 60 minute treatment. This "greenhouse effect" stimulates circulation. Many great results are seen by most people in the first treatment. It works especially well in the heavy adipose areas such as the abdomen, derriere, back, upper inner and outer thighs, hips, and upper arms. These areas are not connected to the skeletal muscles, therefore improvement will appear in the condition of the skin progressively.

The FANIE Contour Restyling Sculpturing Skin Crème is NOT for use by pregnant women or nursing mothers. However, we suggest the use of FANIE Super Moisturizer Skin Crème originally known as "Mothers Crème" (containing Vitamins A & D), to prevent or alleviate stretch marks. Super Moisturizer Skin Creme should be used after washing with FANIE Sweet Birch Herbal Body Cleanser.

**FANIE SWEET BIRCH HERBAL CLEANSER:** It is important that the skin is properly prepared for skin wrapping treatments, Sweet Birch Herbal Body Cleanser is a highly concentrated deep cleanser that dissolves and exfoliates the dead dry skin cells, while flushing impurities from the skin. This cleanser is recommended as a home care bath and shower product for the entire family's daily use. It leaves the skin clean and fresh. A little goes a long way.

**FANIE NUTRI-TONE :** This unique specialized lotion contains many botanical ingredients with added vitamin nutrients to help encourage continuing flexible elastic skin, naturally. Nutri-Tone is the recommended companion product for use after Sweet Birch Herbal Body Cleanser. Nutri-Tone should be used daily between body wraps to keep the skin conditioned, firm and toned. Also this product is used as a unique skin crème for the ultra dry skin of the entire body including the feet and legs. Nutri-Tone is not greasy or sticky and can be used daily to help condition skin for people that are NOT getting the body wraps.

The above products and treatments are recommended for use on women and men of all ages.

**DISCLAIMER:** It must be noted, the FDA considers Contour Restyling Crème a skin Tightener and not a drug. This manufacturer makes no claims. Any claims and/or Representations on the benefits of its use through testimony of its users and by Professional practitioners who use it on their clients and patients.
